7. Appendix A

1. PURPOSE

The Nation's farmlands, forest lands, rangelands, flood plains, and wetlands are unique natural resources providing food, fiber, wood, and water necessary for the continued welfare of the people of the United States and protection from floods. Each year, large amounts of these lands are converted to other uses. Continued conversion of the Nation's farmlands, forest lands, and rangelands may impair the ability of the United States to produce sufficient food, fiber, and wood to meet domestic needs and the demands of export markets. Continued conversion of the Nation's wetlands may reduce the availability of adequate supplies of suitable-quality water, indigenous wildlife species, and the productive capacity of the Nation's fisheries. Continued encroachments on flood plains decrease the natural flood-control capacity of these land areas, create needs for expensive manmade flood-control measures and disaster-relief activities, and endanger both lives and property.

Land use allocation decisions are matters of concern to USDA. Decisions concerning land use arise from needs to accommodate needed growth and development; prevent unwarranted and costly sprawl; avoid unwar-

7 CFR Ch. XVIII (1–1–09 Edition)

ranted conversion of farm, range, and forest lands and wetlands from existing uses and unwarranted encroachment on flood plains; maintain and enhance agricultural and forest production capabilities; maintain wildlife, fish, and seafood habitat; provide or improve community services and facilities; assure appropriate environmental quality; and assure adequate supplies of suitable-quality water. These needs are highly interdependent and often compete with each other for the limited supply of available land and water.

It is Departmental policy to promote land use objectives responsive to current and long-term economic, social, and environmental needs. This policy recognizes the rights and responsibilities of State and local governments for regulating the uses of land under their jurisdiction. It also reflects the Department's responsibility to (a) assure that the United States retains a farm, range, and forest land base sufficient to produce adequate supplies, at reasonable production costs of high-quality food, fiber, wood, and other agricultural products that may be needed; (b) assist individual landholders and State and local governments in defining and meeting needs for growth and development in such ways that the most productive farm, range, and forest lands are protected from unwarranted conversion to other uses; and (c) assure appropriate levels of environmental quality.

In accordance with the authority contained in 7 U.S.C. 1010 and 7 U.S.C. 2204 and consistent with 7 CFR 2.19(f) and provisions of the Farmland Protection Policy Act, Subtitle I, Title XV, Pub. L. 97–98, the Department sets forth this statement of policy on land use.

2. CANCELLATIONS

This regulation supersedes Secretary's Memorandum 9500–2 dated March 10, 1982.

3. POLICY

Federal agencies, in implementing programs, make decisions that affect current and potential uses of land. The Department will:

a. Promote and support planning procedures that allow landholders, interest groups, and State and local governments to have input at all appropriate stages of the decisionmaking process for public projects, programs, or activities; that recognize the rights and responsibilities of landholders in making private land use decisions; and that recognize the responsibility of governments in influencing how land may be used to meet public needs.

b. Assure that programs of the agencies within the Department discourage the unwarranted conversion to other uses of prime
